SKILLS

C++ | C | Javascript | HTML | CSS | Node.js | React | Express.js | MongoDB|MySQL | Mongoose | Tailwind CSS | Bootstrap | Cypress | Socket.IO | JWT | Bcrypt.js | Git | Firebase | Firebase Cloud | Peer JS | Typescript | Cloudflare Workers | Prisma ORM | Next.js | Vue.js | Nuxt | Pinia | WebRTC

WORK EXPERIENCE

- Bullwhip.io** Oct 2024-Present
SDE 1 Remote
 - Developed and maintained the frontend for Beacon, a platform that provides commerce content insights.
 - Built responsive, scalable UIs and optimized performance across web and the Beacon for Chrome extension.
 - Built a Chrome extension to automate Amazon affiliate tag creation, reducing manual effort by 80% .
 - **Tech:** Vue.js, Nuxt, TypeScript, JavaScript, Pinia, Firebase
- Happilyever.co** Jun-Jul 2023
Full Stack Developer Remote
 - Developed several front-end components like dashboards, and chatbots.
 - Coordinated with the design team and created 3+ web pages.
 - Used Cypress and wrote 5+ automated test cases to ensure the delivery of error-free, clean, and efficient code.
 - **Tech:** React, Redux, MongoDB, Golang, AWS

EDUCATION

- Jaypee Institute of Information Technology, Noida** August, 2020- June, 2024
Bachelor of Technology in Computer Science and Engineering CGPA: 8.7
- Paramount International School, Dwarka, Delhi - 12th** 2020
CBSE, PCM Percentage: 95.6
- Paramount International School, Dwarka, Delhi - 10th** 2018
CBSE Percentage: 93.5

PROJECTS

- Toastr**  [Source Code](#)
 - It's a cool lightweight library for toast notifications for React.js / Next.js
 - **Tech:** React, Javascript, CSS
- TalentX**  [Source Code](#)
 - This platform solves the problems of recruiters and students.
 - Students can find people to collaborate on their projects, people can organize hackathons, and recruiters can post job openings, conduct assignments, and take interviews.
 - There are 3 portals of the platform: User portal, Organiser Portal, and Recruiter Portal
 - **Tech:** React, Tailwind CSS, MongoDB, Node.js, Express.js, JWT, Bcrypt.js, Firebase, Socket.IO, Peer JS.
- Paybuddy**  [Source Code](#)
 - This is a platform where you can keep track of all your transactions like how much money you owe someone and vice-versa.
 - Implemented features for adding new transactions, managing existing ones, and splitting bills.
 - **Tech:** React, Bootstrap, MongoDB, Node.js, Express.js, JWT, Bcrypt.js
- Tasklist**  [Source Code](#)
 - This a platform where you can list down all your tasks, check the status of them, change their status to completed, and delete them as well.
 - **Tech:** React, Bootstrap, Node.js, Express.js, MongoDB and Auth0

ACHIEVEMENTS

- A. Goyal, P. Gupta, and K. Pandey, "**Vehicle Accident Detection and Reporting System using Internet of Things**," 2024 5th International Conference on Electronics and Sustainable Communication Systems (ICESC), Coimbatore, India, 2024.
- I was one of the finalists in this coding competition Code Gladiators where more than 20000 people participated.
- A web application (Share2Care) for bridging the gap between the donors and the NGO's was made in Hack Define Hackathon. My team was selected in the Top 25 teams.
